How does this year deliver your curriculum intent?		Students will learn about key processes that shape our planet, including tropical storms in the amazing planet module, and the extremes of hot and cold deserts in the second module of study. Classroom sessions will be highly challenging, but your teachers have a well-planned and creative curriculum that will allow you to make excellent progress and reach your potential in geography. A well-planned classroom and homework curriculum will help you close any gaps in learning due to Covid-related absence.
