How does this year deliver your curriculum intent?	Students will learn about key processes that shape our planet, including tropical storms in the wild weather module, and the extremes of hot and cold deserts in the first module of study. Classroom sessions will be highly challenging, but your teachers have a well-planned and creative curriculum that will allow you to make excellent progress and reach your potential in geography. There is a range of physical geography related topics and human units. You will explore our amazing world we live in and the impacts that humans are creating. This will be underpinned through knowledge of space and place, with a range of mapskills built in to become expert cartographers!
